

VideoRay Pro 4 Water Sampler

The **VideoRay Water Sampler** is a robust plastic syringe-like tool that allows operators to collect uncontaminated water samples up to 100 mL. The transparent plastic tube features a graduated scale for easy measurement and visual inspection of the sample before surfacing.

The sampler easily attaches to the VideoRay Pro 4 skid's existing holes, similarly to the Manipulator Arm. The VideoRay ROV's camera can be tilted down to focus in on the sampler to provide a close view of the operation. When not in use, the sampler can be easily removed.

The Water Sampler is delivered with a clamp assembly that will attach to existing Pro 4 skids. It can be used in conjunction with most other VideoRay attachments such as Imaging and Scanning Sonar and positioning systems.

BASIC SPECIFICATIONS

Depth Rating:	305 mm (1,000 ft)
Sample Size:	0-100 mL
