Doug Walton

August 10, 2018

Just after 16:30 the water rescue assignment was dispatched to Guilford Park for a subject that fell into a pond and did not resurface. E61 arrived first, established a point last seen, and SO swimmers were deployed. Approximately 40 min after dispatch the operation was switched to recovery and the ROV and Boat 11 were deployed. Boat 11 had a probable hit with side-scan sonar and the ROV was able to hook the object which was determined (by swimmers) to be the victim. The victim was brought to shore where P4 was declared and the scene was turned over to HCPD. As a precaution Capt. Zour collected water samples and Safety 1 is filling out a first report of injury form for all swimmers .
