

Accessory Data Sheet

Zoom Camera

The Pro 4 **Zoom Camera** is a “plug and play” externally mountable camera for the VideoRay Pro 4 ROV system. The camera is fully controllable topside through the existing Pro 4 VideoRay Cockpit control software.

The topside capture device also allows for real time zoom output for live viewing while being recorded/encoded to either the Pro 4 PC or an external hard drive (not included).

The Zoom Camera accessory can be added or removed from the basic Pro 4 submersible in seconds. The Zoom Camera is delivered with all necessary hardware and cables, including a custom-built Integration Skid.
