Accessory Data Sheet
Tether Deployment System

The VideoRay **Tether Deployment System (TDS)** is designed to store, manually payout, and retrieve tether while keeping it protected and clean. The TDS features a retractable handle and wheels for easy transportation and consists of a rugged Pelican 620 hard case with a custom slip ring, manual winch handle, and 4.5 m (15 ft) lead of tether to the Control Panel. While the TDS is not required, it is highly recommended to help complete missions efficiently and minimize risk of damage to the tether.

SPECIFICATIONS
