DEFENDER
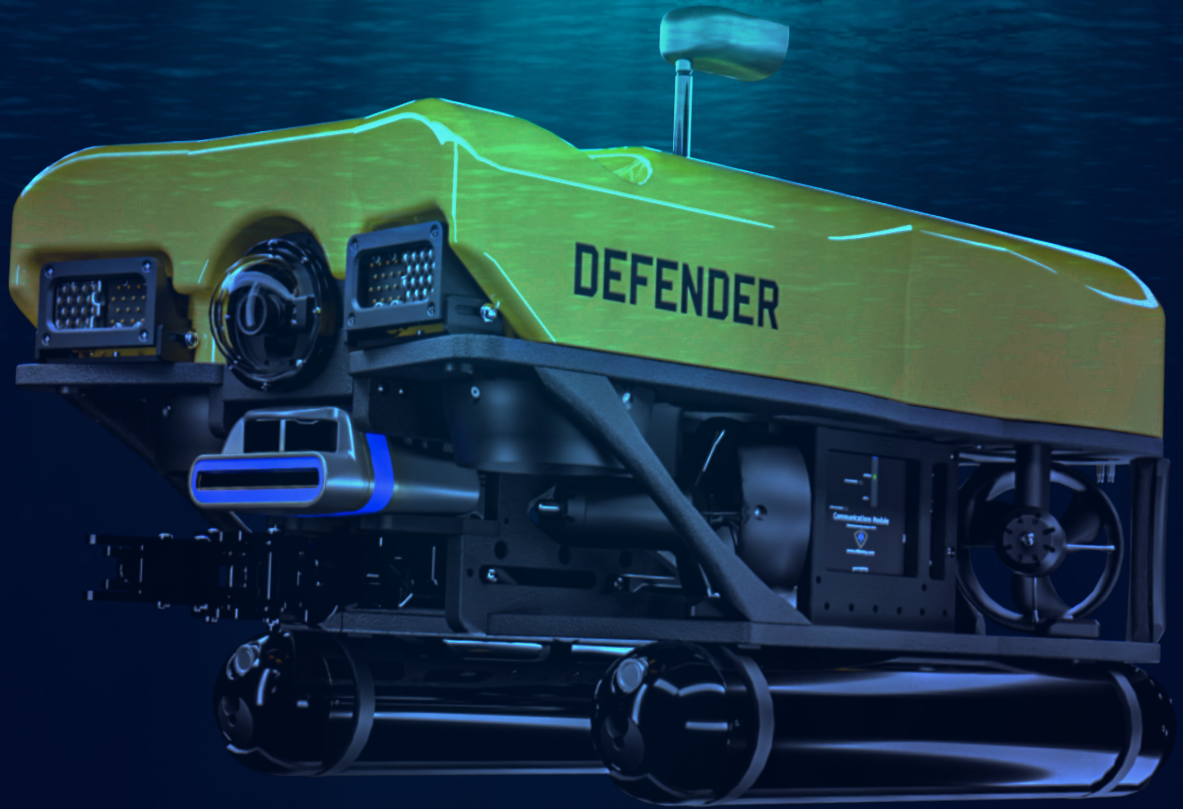

Mission Specialist Subsea Batteries deliver power to Mission Specialist Wraith, Defender, and Ally ROVs without the need for a topside power source. Available with either Nickel Metal Hydride or Lithium-Ion chemistries, the Mission Specialist Subsea Vehicle Battery kit is the perfect accessory for missions where topside power is not available or for mission depths that exceed tether power transmission abilities.

When combined with the lightweight Expeditionary Splashproof Controller and Expeditionary Tether Reel, the system occupies the smallest operational footprint.
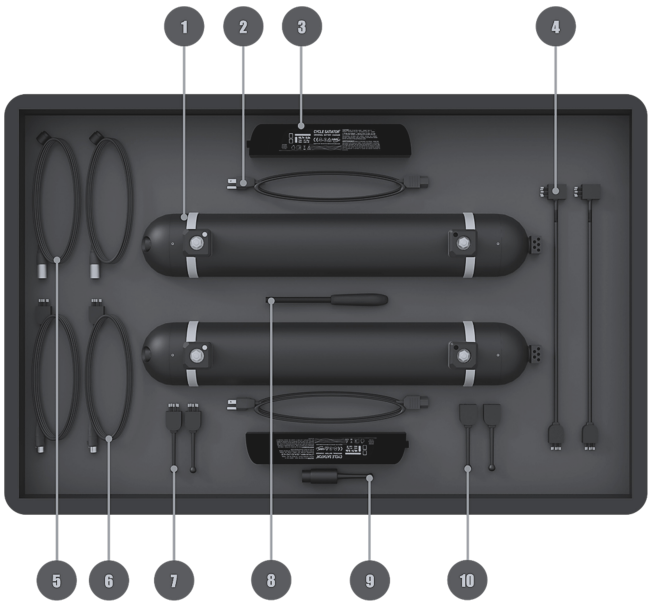

Reliable Power - Anywhere
